LET'S WALK TOGETHER

ODIM GUATEMALA
COMMUNITY-DRIVEN
HEALTHCARE AND EDUCATION.

With only \$30
per month

www.odimguatemala.org/donate

Diabetes is not a death sentence.

But in the rural communities of Guatemala, complications can lead to a life of suffering. With a limited income, access to healthier food options, medicines and information is often out of reach.

You can change a diabetic grandmother or grandfather's life with only \$30 per month.

A patient in our "Let's Walk Together" club receives monthly medical checks and blood sugar tests, medicine (metformin), insulin shots for emergency cases, group exercise and walking sessions, informative talks about living with and treating diabetes, healthy cooking classes and emotional support.

With this holistic approach, patients are accompanied in their journey and find a safe haven to socialize with others living in the same conditions.

When you sign up as a sponsor, you will receive a bio of the patient and yearly updates!

If you'd like to sponsor a diabetic patient, please contact our Development Manager at development.manager@odimguatemala.org
